15 million Americans are on *GLP-1*. The food they need doesn't exist yet. That's the entire opportunity.

Ozempic, Wegovy, Mounjaro, and Zepbound have triggered the largest dietary shift in a generation — and 74% of users suffer side effects (constipation, dehydration, muscle loss) that no mainstream brand systematically addresses. **Matchbox 7** is building the first product line designed end-to-end for that body, anchored on **Monch**, a proprietary water-soluble fibre with 3.3× the gut bioavailability of standard fibre, exclusively licensed for the Americas.

THE PRODUCTS

01

YEAR 1 FLAGSHIP

Monch Protein + Fibre Bar

Indulgent chocolate-brownie bar with candy-like taste, developed by the team behind Muscle Milk.

15g protein (whey + collagen + soy)
8–10g Monch water-soluble fibre
Integrated electrolytes (Na / K / Mg)
<3g sugar · 45g serving
No artificial flavours or sweeteners

$3.49 retail · **$2.49** wholesale

02

YEAR 1 COMPANION

Monch Electrolyte Packet

Bundled with the bar — solves dehydration and GI distress, the #2 GLP-1 side effect. Attach-rate driver.

Monch water-soluble fibre base
Full electrolyte profile (Na / K / Mg)
Mixes into any cold beverage
Three blends: Fibre / Enzyme / Electrolyte
Existing product, proven manufacturing

$1.49 retail · **$0.99** wholesale

03

H1 YEAR 2

Monch Functional Drink

Ready-to-drink format leveraging Monch's water solubility — ~5× stronger unit economics than the bar.

Water-soluble Monch fibre delivery
Electrolyte-fortified
On-the-go consumption format
Formulation in progress with Flavor Insights
Margin-expansion SKU for Y2 scale

RTD · pricing TBD

*A **$58B** drug class scaling to **$133B** by 2035, a **$15.8B** US category with no GLP-1 specialist, and an **18–24 month** head start while major CPG still discusses it at conferences.*
