

15 million Americans are on GLP-1. The food they need doesn't exist yet. That's the entire opportunity.

Ozempic, Wegovy, Mounjaro, and Zepbound have triggered the largest dietary shift in a generation — and 74% of users suffer side effects (constipation, dehydration, muscle loss) that no mainstream brand systematically addresses. Matchbox 7 is building the first product line designed end-to-end for that body, anchored on **Monch**, a proprietary water-soluble fibre with 3.3x the gut bioavailability of standard fibre, exclusively licensed for the Americas.

15M+

Active US GLP-1 users today, growing 2–3x with patent cliff

74%

Suffer GI side effects no purpose-built product addresses

\$15.8B

US protein bar + electrolyte TAM, 7–10% CAGR

\$58B→\$133B

Global GLP-1 drug market, 2026 → 2035

THE PRODUCTS

01

YEAR 1 FLAGSHIP

Monch Protein + Fibre Bar

Indulgent chocolate-brownie bar with candy-like taste, developed by the team behind Muscle Milk.

- › 15g protein (whey + collagen + soy)
- › 8–10g Monch water-soluble fibre
- › Integrated electrolytes (Na / K / Mg)
- › <3g sugar · 45g serving
- › No artificial flavours or sweeteners

\$3.49 retail · **\$2.09** wholesale

02

YEAR 1 COMPANION

Monch Electrolyte Packet

Bundled with the bar — solves dehydration and GI distress, the #2 GLP-1 side effect. Attach-rate driver.

- › Monch water-soluble fibre base
- › Full electrolyte profile (Na / K / Mg)
- › Mixes into any cold beverage
- › Three blends: Fibre / Enzyme / Electrolyte
- › Existing product, proven manufacturing

\$1.49 retail · **\$0.89** wholesale

03

H1 YEAR 2

Monch Functional Drink

Ready-to-drink format leveraging Monch's water solubility — ~5x stronger unit economics than the bar.

- › Water-soluble Monch fibre delivery
- › Electrolyte-fortified
- › On-the-go consumption format
- › Formulation in progress with Flavor Insights
- › Margin-expansion SKU for Y2 scale

RTD · pricing TBD

A \$58B drug class scaling to \$133B by 2035, a \$15.8B US category with no GLP-1 specialist, and an 18–24 month head start while major CPG still discusses companion products at conferences.

INGREDIENT IP

BioLumen

Sole producer of Monch fibre. Exclusive Americas licence + B2B ingredient licensing channel to CPG brands building GLP-1 companion products.

PEDIGREE

Mike Pickett

Muscle Milk founder; CytoSport \$0→\$200M; \$450M Hormel exit (2014).

FORMULATION

Flavor Insights

111K sq ft Benicia, CA facility — the team behind the Muscle Milk taste breakthrough.

CO-PACK

Mr. Bill's Formula Fusion

US bar formulation & manufacturing. Development agreement signed April 2026.
