Building the Nutrition System for the GLP-1 Generation

Matchbox 7 is creating the first product line designed end-to-end for the 15M+ Americans — and rapidly growing global cohort — on GLP-1 medications (Ozempic, Wegovy, Mounjaro, Zepbound). Our products solve the constipation, dehydration, muscle loss, and GI distress that no mainstream nutrition brand addresses. Built on **Monch**, a proprietary water-soluble fibre with 3.3× the gut bioavailability of standard fibre, exclusively licensed for the Americas.

$15.8B
US protein bar + electrolyte TAM today, growing 7–10% CAGR

$58B→$133B
Global GLP-1 drug market, 2026 → 2035 (Evaluate Pharma / IQVIA)

15M+
Active US GLP-1 users; 74% suffer GI side effects no product solves

$0
Purpose-built solutions for GLP-1 side effects on the market today

THE MARKET — THE SIDE-EFFECT ECONOMY IS UNSERVED

The Unsolved Gap

GLP-1 drugs work — but 50–74% of users suffer side effects severe enough that 30%+ discontinue. No mainstream brand systematically addresses:

- **Constipation** — slowed GI motility
- **Dehydration** — reduced fluid intake
- **Muscle wasting** — up to 50% of weight lost is lean mass
- **Nutrient malabsorption** — delayed gastric emptying

Why Now — Four Catalysts

The GLP-1 companion category is at an inflection point. These forces are structural, not cyclical:

- **Mar 2026:** Semaglutide patent cliff — global generics open India, Brazil, China, Canada (40% of world)
- **2026+:** Oral GLP-1 pills launching — ~80% GI side-effect rate, even higher than injectables
- **Jan 2026:** Medicare Part D adds obesity drugs — 40M+ new beneficiaries
- **Q1 2026:** Gut-health captured 30% of food VC

Where We Play

Two of the fastest-growing categories in functional nutrition, with zero GLP-1 specialists today:

- US protein bar market: **$10.7B** (2026), 9.9% CAGR — premium functional bars are the fastest sub-segment
- US electrolyte supplements: **$5.1B**, 8%+ growth, sugar-free up 31% YoY
- B2B fibre ingredient: water-soluble Monch can be incorporated into any food product

SAM (GLP-1 COHORT) **$1.2B**

THE PRODUCTS — A BUNDLED SYSTEM, NOT STANDALONE SKUS

YEAR 1 FLAGSHIP

Monch Protein + Fibre Bar

$3.49 DTC · **$2.49** wholesale · 45g serving

Indulgent chocolate-brownie bar with candy-like taste, developed by the team that built Muscle Milk.

- 15g protein (whey isolate + collagen + soy)
- 8–10g proprietary Monch water-soluble fibre
- Integrated electrolytes (Na / K / Mg)
- <3g sugar; no artificial flavours or sweeteners
- Enrobed in BioLumen chocolate compound (uncoated SKU also available)

YEAR 1 COMPANION

Monch Electrolyte Packet

$1.49 DTC · **$0.99** wholesale

Bundled with the bar or drink to solve dehydration + GI distress — the #2 GLP-1 side effect. Attach-rate driver, not a standalone margin SKU.

- Monch water-soluble fibre base
- Full electrolyte profile (Na / K / Mg)
- Mixes into any cold beverage
- Three blend options: Fibre, Enzyme, Electrolyte
- Existing product — proven manufacturing

H1 YEAR 2

Monch Functional Drink

RTD format · pricing TBD

Ready-to-drink format leveraging Monch's water solubility for maximum convenience and ~5× stronger unit economics than the bar.

- Water-soluble Monch fibre delivery
- Electrolyte-fortified
- Designed for on-the-go consumption
- Formulation in progress with Flavor Insights
- Margin-expansion SKU for Year 2 scale-up

THE SCIENCE UNDERNEATH

Water-Soluble Monch Fibre

Monch is a proprietary water-soluble fibre that achieves **~40% gut absorption** vs. ~12% for standard insoluble fibre. It is fermented by colonic microbiota into short-chain fatty acids (acetate, propionate, butyrate) at >95% efficiency, modulating the microbiome and stimulating endogenous GLP-1 production. Its solubility makes it **universally incorporable** into bars, drinks, powders, and baked goods — opening a B2B ingredient-licensing channel beyond our own product line.

WHY US — FIVE LAYERS OF DEFENSIBILITY

IP
Exclusive Monch Licence
Sole-supply contractual guarantee from BioLumen. No competitor can source or replicate

PEDIGREE
Muscle Milk Team
Greg Pickett (Muscle Milk founder, $450M Hormel exit) develops our flavour profiles via Flavor Insights.

FORMULATION
Only Bar in Class
Premium chocolate + 15g protein + proprietary fibre + integrated electrolytes + clean sweetening — in one SKU.

TIMING
First-Mover
While Nestlé and major CPG *discuss* companion products at conferences, we are shipping. 18–24 month head start.

CHANNEL
B2B Ingredient Upside
Water-soluble Monch licensable to other brands — high-margin, capital-light revenue beyond our
